Arena Library Guide

Arena Library Guide is an additional service designed to let visitors explore what the library offers on their own, to relieve staff or to be used during hours when the library is unmanned.

Arena Library Guide can be used on a customized preset touch screen from Axiell or on a tablet, for example, and signing in is not required. The interface is adapted to work also for people with visual impairments.

Note:

Staff picks and FAQ:s cannot include links to external websites if they are displayed in Arena Library Guide.

The Arena Library Guide user interface

The visitor is met by a simple page with four clear choices:

Search

This is where the library visitor can search the catalogue. With the additional maps service, the visitor quickly gets help finding what shelf the book is on, provided that it is available.

Inspiration

The staff picks that has been added in Arena are displayed under Inspiration.

FAQs

The library's FAQs are shown in a list that is easy to navigate.

Top list

A search query shows the newest books in a way that is optimised for touch screen.

Updating Arena Library Guide

The simple layout in Arena Library Guide is specially developed for not having to be updated, except for the top list which can be replaced to reflect, for example, different themes or wishes.

Updating the top list

Since Arena Library Guide resides on a site different from the one for the complete Arena installation, you have sign in to this other site to be able to update the top list.

1. Navigate to the Arena Library Guide site. Axiell has provided you with the path to the site, typically *https://library.customername.uk/web/alg-customername*.
2. Sign in to Liferay.
3. In the menu to the left, click **Control Panel**.
4. Select the name of Arena Library Guide (typically *alg-customername*).
5. Update the title and the search query for the top list.
6. Save and check that your updates are displayed in Arena Library Guide.

Updating FAQs

You find the articles that the FAQs consist of in the regular Arena content (not the Arena Library Guide site) and these are displayed in Arena Library Guide using the Asset publisher portlet. The articles use the FAQ structure. You can update existing FAQs or add new ones. This is how you update existing FAQs:

1. Sign in to Liferay.
2. In the menu to the left, click **Control Panel**.
3. Under **Content**, click **Web content**.
4. To quickly find existing FAQs, select **Structures** instead of **All** in the menu above the list of articles, and click the **FAQ** structure.

Note:

The most recently edited FAQ article is displayed at the top in Arena Library Guide. To make an unchanged FAQ article appear at the top, you can edit that article momentarily after finishing other updates, by, for example, adding a character, saving, removing the character and saving again. You can change the order of the FAQ articles similarly, by first editing the article you want to appear at the bottom of the list, and then the others, in the order you prefer.
